# My benefits

Dear colleagues:

As announced on ONE, AXA Group has outlined an ambitious mandate to provide all colleagues — regardless of where they are in the world — with a consistent suite of health and well-being services. In 2021, the focus will be on medical checkup coverage, flu vaccinations, health days, and mental and behavioral assistance services.

In the US, we have had a focus on providing colleagues with competitive, high-quality benefits, including a comprehensive series of health and well-being programs. We're pleased to communicate that as a result of this work, the US programs are currently already meeting the standards of care required by the AXA Global Health and Well-being Program.

As a reminder, you can find details about our current health and well-being programs at [www.myaxaxlbenefits.com](http://www.myaxaxlbenefits.com) (copy and paste URL to Chrome browser). We care about your physical and mental health. It is a top priority, and we're proud that AXA has made this commitment.

Be well,

AXA XL Benefits Team
